Acquired an updated skill set to meet current market trends including React, MongoDB, and MySQL. Thrives when using a myriad of technologies while pushing to go the extra mile to build beautiful applications that exceed the rigorous demands of all stakeholders.

**Languages / Skills:** Javascript, JQuery,, HTML, CSS, BootStrap, Node.js, React, Object Oriented Javascript, Timers, Express, Handlebars, MongoDB, MySQL, FireBase, Sequelize, APIs , Router, JSONs , AJAX, Media Queries, SQL, MySQL .

**Technologies:** Git/Github, Heroku.

## APPLICATIONS BUILT

**Plan-It | Repo:** <https://github.com/esarnb/Plan-It> | **Live:** <https://esarnb.github.io/Plan-It/>

A planner application that allows users to take notes, check BART information, Weather data, and Food places near a certain location.

- Team project that required pair programming and extensive use of Git and Github to collaborate.
- Designing and building an application using multiple APIs and libraries. Incorporated login and logout functionality by adding a CDN to the Firebase Auth server.
- Technologies used: GitHub, HTML, CSS , BootStrap, APIs , AJAX , Firebase, JavaScript , JQuery

**Eat-da-Burger | Repo:** <https://github.com/minalk24/Eat-Da-Burger>

Full stack website keeps a track of delicious Burger add, devour and re-order using the ORM concepts.

- Employed HTML, CSS, JavaScript, and jQuery on the front-end and but most of the hard work is done by using Handlebars.js templates. Burgers can be made and stored in a MySQL database through the application by way of a homemade ORM, built using JavaScript through Node.js and Express.js.
- Technologies used: GitHub, Node.js, Express, Handlebars , MySQL, and MVC architecture.

**Constructor-Word-Guess | Repo:** <https://github.com/minalk24/Constructor-Word-Guess> | **Live: On Repo**

Created a game to guess the correct letters to uncover the hidden word!

- A game receives user input using the inquirer and prompt npm packages. Also, used a constructor to randomly selects a word and use the *word constructor* to store it.
- Technologies used: GitHub, HTML, CSS , BootStrap, JavaScript, Object Oriented Javascript, JQuery
